

GridTracker v1.23.1202

An Amateur Radio Companion

December 2nd, 2023

Special Notes

We are fully aware the Audio Alerts and the Call Roster are not connected. The work done in this release allows us to work on that next. I doubt we will release anything for the rest of this year, unless there's a serious issue that needs addressing. We hope to have the new Alert system in place by the end of January 2024.

With the new Call Roster Watcher, Exceptions and Ignore editors; we have removed the wanted Callsign Regex and in the Exceptions the "No Unknown DXCC", "Only", "No" and "Message Regex" as they have become redundant.

To ignore Unknown DXCC either add it in the Ignores settings or right-click the "UNKNOWN" DXCC in the roster when present and select "Ignore DXCC".

To track "CQ POTA" right-click it in the roster and "Add Watcher"

To ignore RTTY Roundup "CQ RU" right-click it in the roster and "Ignore CQ from All"

Enjoy the winter solstice!
